A simple solution to a common problem

- Challenge:
 - Operator tablet content are subjective
 - Typical application is unique to end-user
- Solution:
 - FW Flexible Tablet Interface (FTI)
 - Simple user definable Widget interface
 - Edit existing profiles
 - Create new profiles
- Open to ALL End-Users

1. Open Tablet Configuration web link

- Select machine
- Select profile
- Continue
 - Using a default/predefined profile
- Go to Admin Panel
 - Edit or create new profile

Welcome to FactoryWiz Tablet Interface

This tablet needs to be configured

You are seeing this page either because it is the first time you have used this tablet or because your previous configuration is no longer valid. If a machine is renamed or if a tablet profile is deleted or renamed, you will be returned to this page this page to again confirm the selections. Once you have established the new location you will need to change the bookmark or home page which you use to bring up this interface.

Select machine:

Select profile:

[Continue](#)

or

[Go to Admin Panel](#)

2. Select Edit or Create (new) Profile

The screenshot shows the 'Tablet Profile Configuration' interface. At the top is the FactoryWiz logo. Below it is the title 'Tablet Profile Configuration'. The main content area is divided into two sections. The first section, 'Edit an existing profile:', contains a dropdown menu with 'DL All Options' selected, followed by three buttons: 'Edit' (blue), 'Duplicate' (blue), and 'Delete' (red). The second section, 'Or create profile:', contains a text input field and a 'Create' button (blue). At the bottom of the interface is a red 'Log Out' button.

3. Select/add standard, E-mail, Idle & Mode widgets

Add Widget ⊗

Standard Widgets

Email Widgets Add

Idle Reason Widgets

Mode Widgets

4. Select / Unselect Widget Options
